

ROFI RAPID TENT 600 SERIES MKII

Description

ROFI RAPID MK II tent is a high pressure, medium weight inflatable shelter that requests a simple logistic support to deploy. The set up time depends on the power of the inflating compressor.

The RAPID 600 series comes in three different lengths of six, eight and ten meters and a width of six meters as standard. They can be connected to each other length- and cross-wise and to other shelters like containers and vehicles, among others.

Three layer windows allowing natural ventilation, with curtains operated from the outside.

Inner liner, RIS (ROFI insulation System) inner liner, for special climatic conditions, partition walls and flysheet are available booth for 2 door and 4 door models.

Integrated anti-skid PVC floor protect against surface water, reptiles or bugs.

Areas of use

- Field hospital
- Accomodation
- First Aid Station
- Admin/staff tent
- Recreation area
- Decontamination

Highlighted accessories

Inner cabin

The practical and compact **inner cabins** facilitate a degree of privacy, and forms an individual shelter area for sleeping, reading, browsing or just relaxing.

Lights

ROFI provide complete integrated indoor **lighting systems** with LED lighting fixtures, electrical wiring, switches and suspension supplied in a sturdy aluminum box. Degree of Lumen and IP-class to be chosen by each individual organization/agency.

RIS

To stabilize the inner climate, and indeed to reduce the power consumption if the tent is fitted with heating or AC-systems, the special **ROFI RIS** (ROFI Insulation System) is most suitable as inner lining in our range of tents. Studies have proven the efficiency of the RIS.

Floor tiles

Solid, plastic **floor tiles** is one option to create a most practical flooring, stand-alone or as basis for further layers.
